### Desired Qualifications

#### Position Summary

#### DESCRIPTION

Under direct supervision the Associate Application Engineer/Engineering Analyst provides all analysis, coordination and control for the processing of engineered motor control center orders. This includes analyzing order specifications, drawings, and terms and conditions, resolving and documenting exceptions and questions, instructing and coordinating mechanical and electrical drafting work, generating of bills of material, purchasing special equipment, coordinating activities during manufacturing, assembly, and test, making changes and revisions, and managing the commercial aspects of the order. To provide technical and engineering support to Rockwell Automation Field Sales Offices for Motor Control Centers and related equipment.

1. The Associate Application Engineer/Engineering Analyst will review customer specifications and drawings (one-lines, elevations and schematics), for correctness and completeness and resolve discrepancies.
2. The Associate Application Engineer/Engineering Analyst is responsible for preparing a complete bill of material, which satisfies the order requirements.
3. Develop the necessary electrical schematics and instruction for drafting.
4. Provide technical assistance to internal/external customers.

**Billable: GMS only - 85% time billed to customer**
